Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1-4 are pending.

#### ***Claim Objections***

1. Claim 2 is objected to because of the following informalities: Line 10, the term "strong" should be "string". Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al. (U.S. Patent No. 5,557,686). Referring to the rejection of claims 1 and 2, Brown et al. discloses a method and system of producing a time and digit dependent password comprising: the steps of sending a string of digits including at specific time locations digits when compiled defining a specific password, compiling the digits appearing at the specific time locations into a continuous unspaced group of digits, and producing a recognizable signal upon the compiled group of digits matching the specific password in Column 3, lines 34-37, Column 5, lines 48-67, Column 6, lines 1-67, and Column 7, lines 1-66.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 3-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Arnold et al. (U.S. Patent No. 6, 601, 175).

Referring to the rejection of claim 3, Arnold et al. discloses a password transmitted system comprising: a password employing characters, means for entering each character, the password requiring each character to be entered into the system at specified time relative to entry of a first character of the characters to cause the password to be accepted in Column 6, lines 12-28, Column 8, lines 42-54, and Column 9, lines 4-22.

Referring to the rejection of claim 4, Arnold et al. discloses the claimed limitation wherein the password transmitted system comprises an accumulator, a clock, and the clock allowing entry of characters into the accumulator only at specified times as determined by the sequence of the characters in the password in Column 8, lines 42-67, Column 9, lines 1-45.

**Conclusion**

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vaughn (U.S. Patent No. 4,800,590) discloses a computer key and computer lock system.
